

Financial Management Business Intelligence

**Achieve Excellence! Easily Capture & Visualize Big Data
Closing the Performance Gap**

Streamline your company's operational reporting and **analytics** with UniFocus' Business Intelligence software. Capture collective results across **big data** and close the gap between performance and potential in your organization's operations.

Business Intelligence easily aligns large volumes of data across various systems enabling fast access to all of your business performance data, anytime and anywhere. The

dashboard scorecard is cloud based and fully-hosted by UniFocus. This cost-effective and user-friendly reporting tool enables your organization with the ability to consolidate measurement information relevant to progress against strategies.

Executives and leadership are provided with a **clear window** to view organizational and financial improvements mapped with goals. Step by step progress is easily measured in relation to actions the management teams have implemented. Reporting at business unit and regional rankings include trending comparisons year over year.

Key Benefits:

- Visualization of **real-time** key performance indicators (KPI's)
- **Customizable dashboard** reporting
- **Integration** of big data for informed decisions
- **Simplify** planning, budgeting, and forecasting
- Focus and improve resource utilization
- **Drives action** and decisions by managers and executive staff with data-rich reporting
- 24/7 access for **unlimited** number of users
- All **data** and reporting exportable to Excel®
- Dynamic **drill-down** capabilities

Have the information your company needs when and where your team requires it with UniFocus' Business Intelligence Dashboard to exceed expectations on a daily basis.

UniFocus is exclusively dedicated to providing the Hospitality, Service, Retail, and Healthcare Industries with the most comprehensive Financial and Workforce Management systems and Survey Solutions available worldwide.
